Schirmwerk

Schirmwerk

We love water!

FARE is full of energy. Everyday drops from the sky are the driving force behind the idea engine in our umbrella factory. As long as it rains, we will supply the demand for real brand umbrellas in a world which owes its diversity to the element of life.

Sparkling Ideas

FARE products have been awarded many internationally recognised prizes for their trendsetting design and functionality. Continual innovations at FARE are constantly raising the bar and continue to delight with intelligent and creative ideas.

Designpreis Deutschland – The Designpreis Deutschland (Germany design prize) is the highest consecration for design and is awarded by the Federal Ministry for Economics and Technology. Primarily honoured are developments which have already proven their marketability and which have future potential. The FARE®-Exzenter mini umbrella (item 5199) has been nominated for 2014.

red dot design award – The red dot is a globally recognised and highly respected quality seal. Since 1955, the red dot award has developed into one of the most important international competitions for product design and architecture. The entire range is judged in nineteen categories based on strict criteria, which are constantly adapted based on new discoveries. Four FARE products have been selected by the top expert jury, and the FARE®-Exzenter mini umbrella (item 5199) received an honourable mention in 2013 for particularly successful solutions.

honourable mention 2013

Art. 4670, 5071, 5199, 5471, 5670, 5671, 7949

Best of Bestsellers – Around 400 companies from the industry, trade and the service sectors in Germany, Austria and Switzerland meet annually at the WerbeWiesn in Munich, the specialised trade fair for advertising media and fair design, in order to present their newest advertising materials. The awards ceremony is separated into the categories of promotional items, medium range and VIP gifts. Here, FARE has been able to win many prizes for its creative solutions and the exceptional quality of its products. The Colormagic automatic regular umbrella (item 1142C) won in 2012.

PromoFritz Award – Promoswiss, the industry association for the Swiss advertising material industry, awards the PromoFritz award once a year. In this competition, outstanding promotional items and concepts which are used in commercial, cultural or public service areas in Switzerland are awarded prizes. A jury of experts from the fields of marketing, advertising, specialised media and promotional items assess the products based on the criteria of originality, uniqueness, implementation of the advertising message, communicative sustainability, functionality and use value. FARE umbrellas also take top positions here – in 2013, they received the bronze PromoFritz award for the asymmetric FARE®-Exzenter mini umbrella (item 5199).

Watertight Arguments

The highest quality and on-going optimisation – that's what the FARE brand stands for. This not only provides a large variety of models but also watertight arguments for trusting cooperation.

Certified – In regular intervals the TÜV Rheinland Products GmbH checks the majority of FARE umbrellas for the following quality features:

- Wind resistance
- Break-strength tested
- User friendliness
- Waterproof
- Flexibility of the rib construction

The certified FARE umbrellas are identified with the relevant stamp in the catalogue and fulfil the requirements of TÜV Rheinland standard 2 PfG 1048/11.06. The production is subject to at least one audit per year by TÜV Rheinland LGA Products GmbH.

Safe – As an independent laboratory, LABTECH Prüfungsgesellschaft mbH in Quakenbrück checks FARE's compliance with the EU's REACH regulation (Registration, Evaluation, Authorisation and Restriction of Chemicals). FARE therefore ensures that all legal regulations on harmful substances have been observed and that only safe products reach the market.

Human – FARE is a member of the BSCI (Business Social Compliance Initiative) and is subject to this code of conduct. It is based on the UNO's Declaration of Human Rights, the conventions of the International Labour Organisation (ILO) and the UNO regarding the rights of children as well as the elimination of discrimination against women, the UN Global Compact and the OECD guidelines for multinational companies. Responsible behaviour and, most of all, better working conditions should be achieved as a result.

The focus is on the following requirements:

- Compliance with laws
- Environmental protection
- Freedom of assembly
- Prohibition of child labour
- Right to collective action
- Prohibition of forced labour
- Regulated working hours
- Prohibition of disciplinary measures
- Statutory minimum wage
- Prohibition of discrimination
- Health and safety in the workplace
- Management systems

Heading for new shores.

Freshly dived up – 10 novelties for 2014

Mini umbrellas

Suitable for a handbag

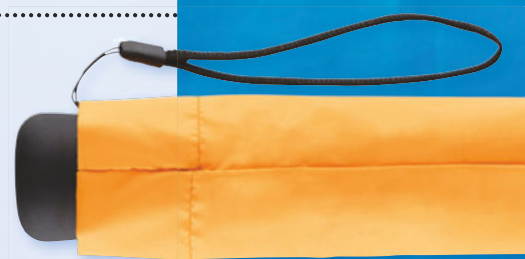

This mini is extremely slim and is able to fit even into the smallest bag. The windproof-system means that it is still able to withstand many a hefty gust.

Page **13**
Article **5070**

Page **16**
Article **5730**

The athletic lightweight

Simply magnificent: the titanium finish gives the robust pocket umbrella a touch of elegance. It is competently able to withstand stormy weather thanks to the windproof-system.

Format technology

The plastic handle with its brushed aluminium finish gives the umbrella a touch of elegance and it goes perfectly with the reflective piping. There is an expansive cuff case.

Page **21**
Article **5640**

Page **27**
Article **5655**

Sits perfectly in the hand

Designed to withstand stormy conditions thanks to the windproof system and gear stick handle. Particularly high quality mat silver and grey finish.

Regular umbrellas

Certain protection from the rain

Cheerful, child-friendly design with the minimum risk of injury. With silver reflective piping for improved visibility in the rain and darkness.

Page **39**
Article **6902**

Harmony as never before

Cover, handle and top offer a uniform image in complete harmony in all five colours. The reflective piping along the seam offers a real plus in terms of safety.

Page **43**
Article **1744**

Short openings

A short jerk and the runner clips into place. Ideal for all who prefer mechanical to automatic opening without having to compromise on convenience. The specially coated crook handle sits well in the hand while the titanium finish gives the umbrella an elegant look.

Midsized Umbrellas

Page **59**
Article **4495**

Composed in pretty colours

Consistently uniform colour tones are the hallmarks of this midsized umbrella. Particularly eye-catching are the coloured fibreglass ribs, the exclusive handle and the top in its timeless, subtle elegance.

For the sporty gait

The new type of handle sits securely in your hand – and the automatic frame is also a helpful feature when it's really stormy. A classic format for a feeling of security.

Page **62**
Article **4155**

Golf umbrellas

Page **69**
Article **2393**

A joy of colour

The square shape gives this umbrella a hint of extravagance. Its innovative uniform colouration of shaft and cover are also unusual – a new example of pioneering design.

In 2010 FARE® introduced a new safety system for telescopic umbrellas: The **FARE® Safety-Closing-System** prevents the shaft from springing open out of control, for example if the handle slips out of your hand. A special braking mechanism ensures that the telescope shaft remains exactly in the position you put it and that you are in control at all times.

This **stop and go automatic** feature not only prevents accidents, it is also very easy and comfortable to use and an additional protection when closed.

Article 7770

FARE®-Comfort alu regular umbrella

12/14 mm Aluminium shaft in titan finish, shortened open- and close mechanism, fiberglass ribs, special coated crook handle, black nickel-plated tips

code.fare.de/7770

Short openings

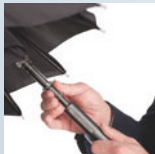

A short jerk and the runner clips into place. Ideal for all who prefer mechanical to automatic opening without having to compromise on convenience. The specially coated crook handle sits well in the hand while the titanium finish gives the umbrella an elegant look.

Significantly shorter opening stroke. Frame and handle in a high quality titanium finish.

BLUNT marketed exclusively by FARE®
in Germany, Austria and Switzerland

fare.de/en/blunt

Special features of the BLUNT models

- Uniquely tensioned canopy combined with a flatter aerodynamic profile without any sharp edges and weak points
- Telescopic ribs which transfers the opening force into the patented BLUNT tips on the end of each rib
- The revolutionary Radial Tensioning System (RTS). redirects, transfers and distributes the effort used in opening the umbrella throughout the entire canopy surface
- Resistant to extreme weather conditions (stormproof up to 120 km/h)
- Advanced Push/Pull runner
- Long life (sustainable)
- As the Blunt canopy unfurls the additional "double struts" redirect the user's effort into the specially designed "floating ribs"

BLUNT Original

14 mm black anodised aluminium shaft, fibreglass ribs, straight black handle made of thermo plastic rubber (TPR), safety runner (TPR), cover 100% quick dry polyester pongee, BLUNT Radial Tensioning System (RTS) - stormproof (up to 120 km/h), packed in a high-quality black gift tube

PRINTING EXAMPLES

From one source

FARE provides you with the branded product exactly to your requirements. Here you can see a few examples. For more ideas and a detailed offer please contact the FARE service team.

Specially modified FARE umbrella handles or custom made present boxes can be developed for you so that you can be sure to have the promotional umbrella ideally suited to your brand.

CHIMELLA®

Not an umbrella in the usual sense - but we make just about anything possible. There's no limit to our imagination when we work together. We are your reliable partner, even when it comes to meeting the most unique requirements.

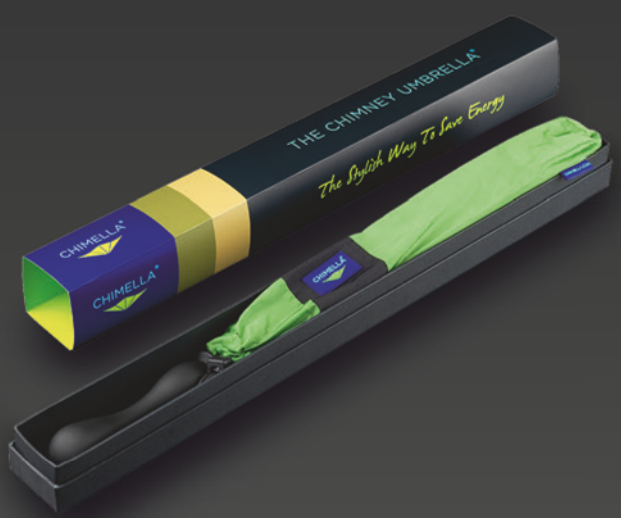

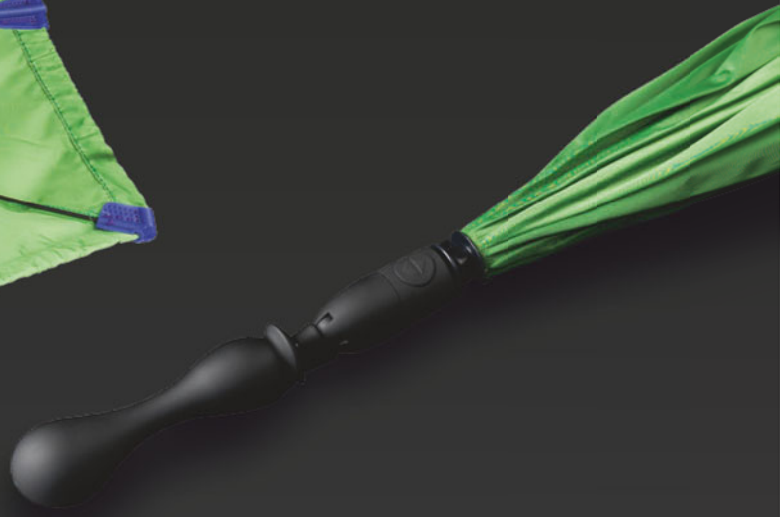

chimella.com

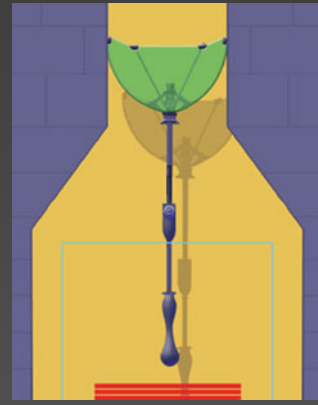

The CHIMELLA chimney umbrella

Some households are literally flushing their money out the chimney: whenever there's no fire in the fireplace, all the warmth from the heating system can escape freely up the chimney and send heating costs through the roof. The **CHIMELLA** was specially developed to significantly **reduce heat loss**: It efficiently blocks air drafts for the long term.

The Stylish Way To Save Energy

Textile coatings – for long-lasting umbrellas ablaze with colour

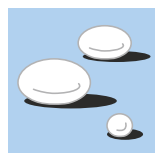

The shades of many FARE® umbrellas are treated on the outside with high-quality finishes as well as being given a water-repellent coating from the inside.

Optimized roll off effect by FARE®-PEL coating

Original Dupont Teflon® coating

Material repels water and dust

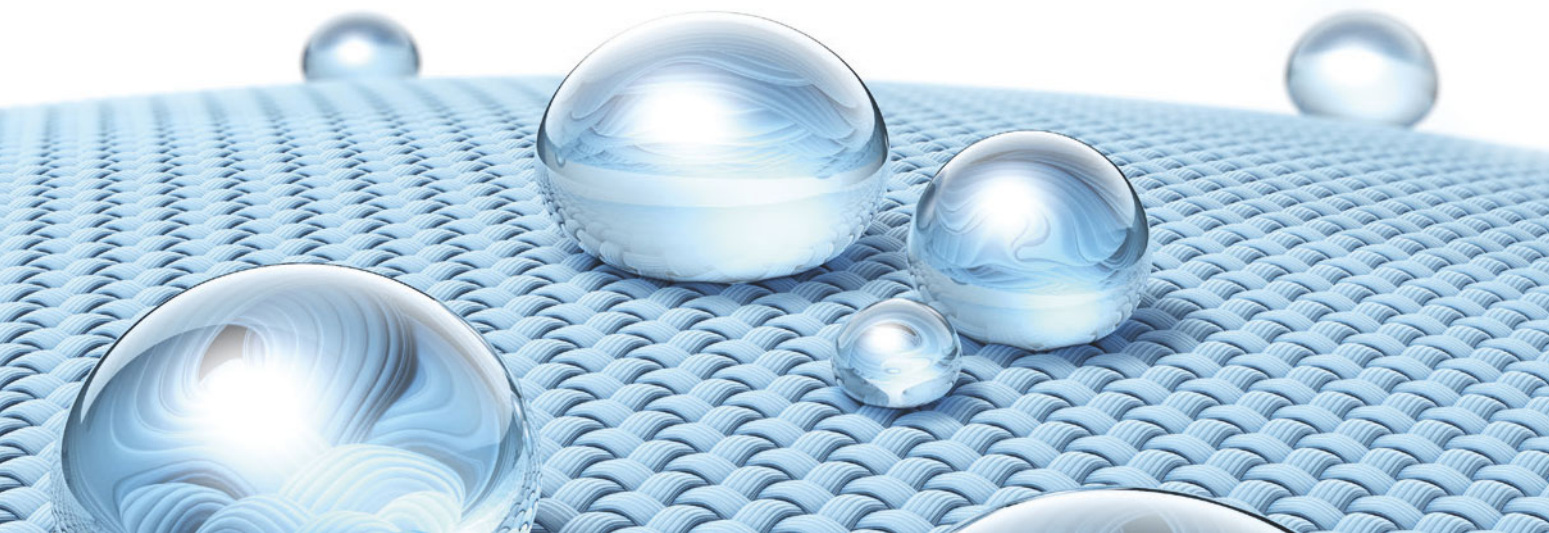

Optimized roll off effect by NANO coating

FARE®-PEL – a protective coating only available from FARE which makes the shade surface particularly durable. FARE®-PEL repels water and stains, causing rain and dirt to just pearl off.

Teflon® protective coating – Teflon®-coated umbrellas are treated with Teflon® protective coating from DuPont™. This coating ensures that water and dirt can easily be removed from the umbrella shade. Teflon® has water and dirt-repellent properties but doesn't impair the breathability of the fabric.

Nanotechnology – nano-coatings on umbrellas create a "lotus" effect. The lotus effect describes the low surface wettability seen in the lotus plant. The minute rough structure on the leaves creates a fascinating effect. Unlike smooth surfaces, dirt and water pearl off without leaving a residue. The nano-coatings developed for our nano-umbrellas also bind seamlessly with the shade fabric. This long-lasting effect repels water and dirt and prevents them from sticking to the rough surface.

Greater safety on the road with FARE[®] umbrellas

Pedestrians are especially dependent on being seen early. Wet streets, dim lighting and dark clothing make them almost invisible in bad weather. In these conditions, specially equipped umbrellas can help e.g.

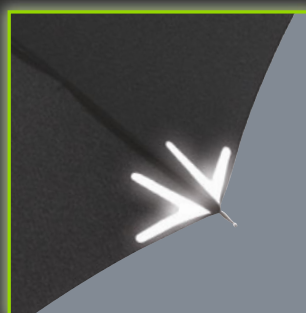

Reflective printing

Can be applied to all FARE umbrella models. Customised application can be realised according to your wishes. Please ask us - we would be delighted to make you a personal offer.

LED lights

The FARE umbrellas in the Safebrella family, (items 5171, 5471, 5571 and 7571), are equipped with LED lights in their handles. This allows them to light your way.

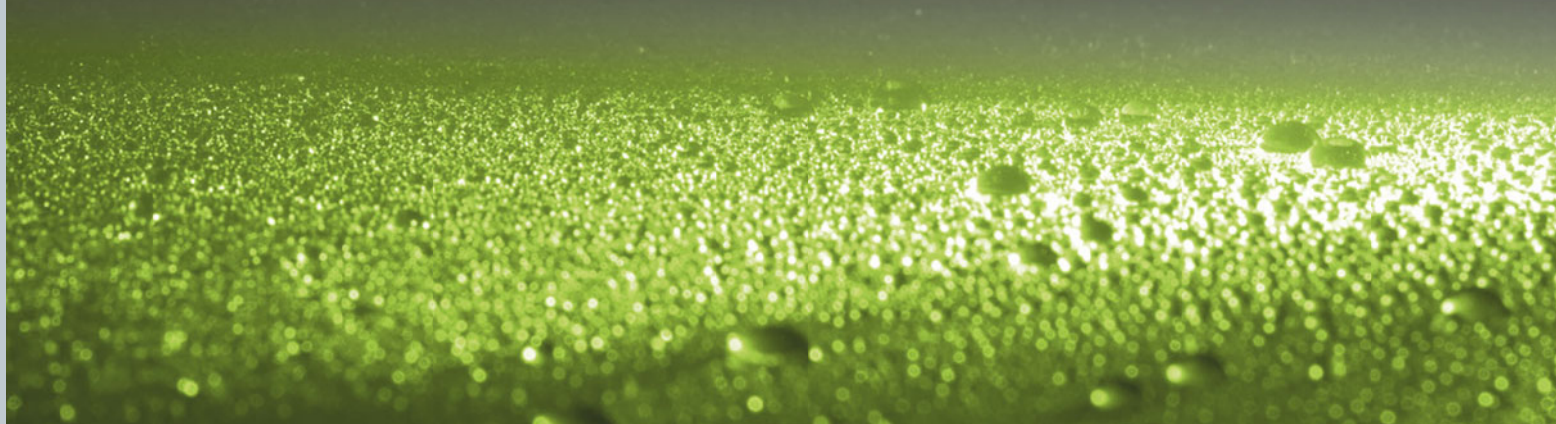

Reflective corners

Corners made of 3M[™] Scotchlite[™] are used for items 5071, 5171, 5471, 5571 and 7571 as standard. They can also be provided for other FARE umbrella models.

Reflective piping

The light, which passing cars cast on pedestrians, for example, is reflected by the reflective piping (in accordance with DIN EN 471). Can be applied to all FARE umbrella models.

Lots of room for creativity in your publicity

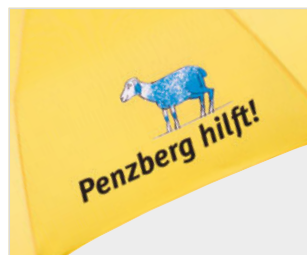

Take advantage of numerous branding opportunities to focus attention on your business name and promote your image. From bright screen printing to elegant embroidery or laser engraving there is the right answer for all needs and budgets.

Screen printing

Up to 8 colours to highlight your company logo.
High quality and long life.

Printable areas:

One or more canopy panels, closing strap and cuff case

Colormagic® print

(see item 1142C on page 45 and 5042C on page 15)

With Colormagic®, the print area changes colour on getting wet, transforming white into a bright rainbow palette.

Note: Colormagic® prints lighten or weaken the screen print colour and the metallic tones lose their glossy effect.

Screen print without Colormagic® print

Screen print with Colormagic® print in dry condition

Screen print with Colormagic® print in wet condition

Transfer print

Sophisticated images in brilliant colours.

Printable areas:

One or more panels and cuff case

Sublimation printing - only possible on white umbrella covers

code.fare.de/

Set up cost per logo/per colour	€ 17.00
For quantities below 10 pieces	Fixed handling charge 50€ per print order.

Screen printing on Travelmate bags

Price on request.

Film costs for umbrellas and parasols

Up to DIN A4 (210 x 297 mm): € 22.00 per colour/logo, up to DIN A3 (297 x 420 mm): upon request.

These charges include **one** film-proof including one computer printing layout and **one** amendment. For each further amendment of the logo there will be an extra charge of **€ 17.00** for the first colour/film and **€ 9.00** for each further colour/film.

Print proof

For umbrellas and parasols: screen print **€ 22.00 per logo/colour** (plus screen costs + article price + forwarding costs), delivery time for print proofs: approx. 1 week.

Artwork

The initial costs of screen-printed advertising can be kept as low as possible by sending 1:1 films ready for screen-printing (= top-coated positive films). If films are not available, we will need vectorized graphic files in .eps format. Please create files in spot colors and convert fonts into curves. Other data formats (for example .jpg files) saved as EPS files cannot be used! Film charges and the creation of reproducible templates will be invoiced according to the time and effort required.

White underlay

In the majority of cases, colored prints require a white underlay to ensure an optimal result. This white underlay counts as an additional printing color and will incur extra charges accordingly. **White prints on a colored background must be printed twice.** Double printing is subject to extra charges for an additional print color (these are incurred once only). No white underlay is required for prints on white umbrella covers or for print colors silver, gold and black.

Colormagic® imprint

Colormagic® overprint tones down screen-printed colors. Color matching with Pantone or HKS colors cannot be ensured and does not constitute any ground for complaint. We recommend the production of a proof sample.

Doming (photo sticker)

To be fixed in handles with suitable handle groove or on metal plate of  Travelmate bags. **Prices are valid for one up to multicolour prints.**

Caution: for technical reasons, the print area will be a little smaller than the total size indicated.

Important information

Liabilities of colours, sizes and weights

Caution: the colours shown can be different from the original and are not binding. All measures and weights are approximate. They are based on average values, but can differ with each production. If you need exact details, please contact us.

Spot colours

Please take into account: In cases where colors are defined using Pantone or HKS, these will be mixed according to C for Pantone and K for HKS unless alternative instructions are given (however, textiles cannot be given high-gloss coverage). The material properties mean that 100% compliance with Pantone or HKS color definitions cannot be achieved.

Samples

For administrative reasons samples cannot be returned.

Delivery time

Unbranded goods: approx. 1 week after receipt of order
Branded goods: approx. 3–4 weeks after order confirmation and approval

Prices

Ex works + carriage and taxes. From order value € 1,000.00 (not including printing charges) delivery is free house in Germany or free German border for export. 8107, 8207, 8900 as well as all BLUNT models will be delivered ex works only.

Remarks

All order subject to our general sales conditions and terms of payment and delivery.
